BACKGROUND OF THE INVENTION

0001. "Dermawear" residing in the medical field is a ~~subgarment~~ of cloth equipment set forth as a useful stratagem of skill and ingenuity in defeat of, or against the inoculation of sexually transmitted diseases of the ~~male genital region~~ *and female genital* male genital region.

0002. Endeavoring to achieve a purposeful end of health ~~for all men~~,

"Dermawear" is classified as medical equipment, because the related subject matter of sexually transmitted diseases ~~in this invention~~ *is the nature of this invention.*

(Dermawear), on behalf of the male genital region, warrants it and further

defines the scope of "Dermawear's" functioning authority to thwart the attainment of skin pathogens upon the ~~male pubic area~~ *genitalia of individuals engaged*

in sexual intercourse

Prior Art: "Not Applicable."

BRIEF SUMMARY OF THE INVENTION

0003. The substance of "Dermawear" is its practical use as a protective ^{garment} ~~subgarment~~ (Fabric Shield) during sexual intercourse.

0004. The utility object of "Dermawear" is its specific action of purpose to protect its user from sexually transmitted diseases, since prophylactic use alone leaves the pubic hairs and scrotal ^{Scrot, mons Pubis} ~~skin~~ exposed

during genital copulation; "Dermawear" protects these exposed areas:

Clitoral hood, clitoris, labia majora, labia Minora, perineal body, urethral orifice, skene's gland orifice, bartholin's gland orifice, of the skin and mucous membrane exposed during genital copulation.

again, Dermawear protects these exposed areas of the male and female genital anatomy... etc.

BRIEF DESCRIPTION OF THE DRAWINGS

0005. Figure 1A depicts a front view of "Dermawear." ~~"Dermawear":~~
~~(Fabric Shield):~~ as a garment to be worn during
genital to genital copulation.

0006. Figure 2B is an arrow pointing at the "Receptacle Rim."
~~"Dermawear": (Receptacle Rim)~~ which is a hole cut in
the fabric shield with an elastic band
to grip the base of a condom covered penis.

0007. Figure 3C is a representation of the different borders that the
"Receptacle Rim" can have as a shape when designed specifically
and/or solely as Dermawear for women.

DETAILED DESCRIPTION OF THE INVENTION

0008. To produce "Dermawear," a person of ordinary skill in the pertinent art of ~~sub~~garment manufacturing can make this invention without experimentation, by simply taking 100 percent cotton fabric and interlocking (weaving tightly) the material and double butting (a 2 in 1 subgarment) the cloth; and in the center of the ^{garment}~~subwear~~ at exactly the location of the penis, ~~and/or vaginal canal~~ cut out a 1/2 inch hole (See figure 2B/Drawings) or "Receptacle Rim." ~~The hole ("Receptacle Rim") may be set forth in a circle (or triangle, rectangle, octagon) as its primary border.~~

0009. "Dermawear" is set apart as a new invention, predicated ~~solely~~ upon its intent ^{OF} ~~or~~ application ^{IN} of utility ~~(use and/or function)~~ ^{as a wearable medical garment that shields the area of the genital skin not protected by a "Dermawear" and the "Receptacle Rim" is newly functional based upon the condom during sexual intercourse.} ~~That is, "Dermawear" and the "Receptacle Rim" is newly functional based upon the intent of use by its user.~~

00010. "Dermawear's " intent of application makes it dissimilar from all other ^{garments}~~subgarments~~, and therefore it is a new invention.

~~DETAILED DESCRIPTION OF THE INVENTION~~

~~00011. The "Receptacle Rim," (1) Receptacle: a container, as in the subgarment itself, containing the male genital region; (2) Rim: a hole within the garment primarily bordered as a half-inch circle which serves as an outlet for what is contained; in the case of "Dermawear," that would be an erect penis.~~

~~00012. "Dermawear" as a subgarment with its "Receptacle Rim" is a combined function of use (utility): protective (fabric shield) and an outlet (Receptacle Rim). (1) protective of pubic hair and scrotal skin; (2) and a safe outlet for an erect prophylactic penile shaft.~~
